**Subject:** disagreement

Madam, Sir,

I do not agree to the settlement that is currently going to be discussed between the States of the USA and Microsoft. With this settlement, Microsoft's market position would be further strengthened, alternatives would be removed from the market, and eventually we would be depending only on this one company in executing all the tasks for which we use computers. It's the freedom of choice that is at stake. So please, consider the facts carefully and decide for the good of the people whom you represent, and not for the good of a company which becomes increasingly dangerous.

Thank you,

Dr. Martin Senftleben
